

# Localized Keys Iterator

Team

Growth Session #22 - February 15 2019

- A tool for iterating through XCode project to find matched localized keys
- Write the found keys incrementally in Localizable.strings files
- Currently used in Braive

## Supported format

```
"general.some-string.hello".localized
```

## Native format

```
LocalizedString("general.some-string.hello", comment: "This is a hello word")
```

- Add support for Swift Package Manager
- Add unit test coverage

- Now supports Swift Package Manager
- Prepared for command line arguments support
- Decomposed each step into objects

## Next Steps

- Check out BartyCrouch 4.0.0
- Add unit test coverage
- Add support for .stringsdict files
- Add support for command line arguments
- Add clean command

# Thanks!
