

# Gatsby JS

Yutthana - Tinn

Growth Session #14 - May 17-18 2018

- Static site generator for React.js
- Pulls data from your data source via GraphQL
- Sends data from GraphQL to the “data” props on your component
- Uses that component to render your data

# How Gatsby Works

## GatsbyJS from novice to ninja with 3 core concepts

- You must know React.js
- You must know GraphQL
- Spend a lot of your time to explore GatsbyJS plugins. This is the core issue because GatsbyJS uses a lot of many plugins to achieve anything

## Example project

- This project aim to known the taste of using GatsbyJS to build static website
- For data source. I use our [Compass](#) content (Markdown files)

GatsbyJS is a good choice if you want to build astatic website provided you have a good knowledge of React.js and GraphQL :)

# Thanks!
