

Android Template

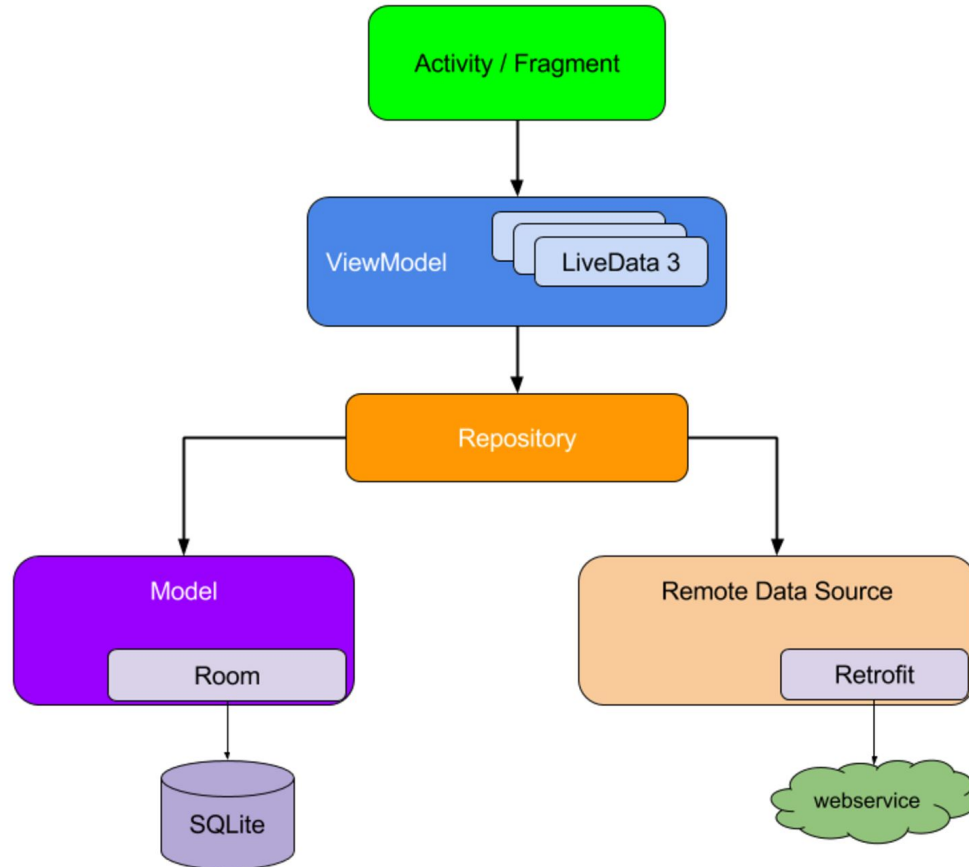

Trung

Growth Session #6 - August 24-25 2017

Create a ready-to-use project template for future usage

- Hassle free on creating a new Android project.
- A project should be easy for maintenance and scalable.
- Advance in implementation but highly readable.
- Test cover.
- Continuous integration and delivery.
- Kotlin support.

Applied technologies

- RESTClient ready to used with Retrofit2 with RxJava adapter
- Following the architecture guideline from Google
- Latest Android Architecture components from the latest Google I/O 2017 (ViewModel)
- Gradle configuration.
- ...

Next Steps

- Start getting feedback from teams from the current structure
- Discussion about advantages/tradeoff/disadvantages.
- Continue on completing the Test suite.
- Drop it to CI

Thanks!
