

xcbakery

Jason

Growth Session #5 - July 20-21 2017

- Make new project from template.
- Save times and reduce mistake on making new projects.

Achievements and progress

- Working prototype
- Now on the level of real productive

How does it works

1. Prepare template
2. `xcbakery prepare -p template`
3. Edit `xcingredient.json`
4. `xcbakery bake`

Next Steps

- Setup repository (README.md, roadmap).
- I think this software can be used on any other projects too. I am considering it to rename to bakery.

Thanks!
