DEVELOPMENT

PRODUCTION

⚠ A new step can only be started after the previous one was accepted.

There is also additional scoping work after steps #1 and #3.

Once the UX flow has been accepted, it is important to do a quick review of the user stories to make sure that nothing was forgotten and to update the stories if the accepted flow changes what was assumed during the initial scoping phase.

Another, more thorough review of the stories must be done after the final UI has been accepted. There will most likely be new features and details added by the designers.

⚠ Not reviewing the project scope after the UI is accepted will inevitably lead to delays in the project and frictions with the client (if not more).

## Reviewing Design Material

Reviews will be required at all three steps of the desing process. The review schedule should be as follows.

### UX Flow

- Initial internal review when the flow is ready
- Review with the client after internal review passed
- Acceptance by the client

### Wireframes

- Each wireframe is sent to Invision when completed
- Internal review is conducted
- Each wireframe is submitted to the client as soon as the internal review passes

There are several benefits to reviewing each wireframe as soon as possible:

- More attention can be given to each, individual review,
- Fixes on the wireframes can be done faster,
- The client can see concrete progress sooner.

### Final UI

The review process for the final UI is the same as the wireframes review process. The goal is to get each screen to the

# Achievements and progress

- Frontend setup
- Jekyll fully setup
- Code syntax highlighting
- Content write-up under-way
