# Athena - Repo Dashboard - Bitbucket + Github

Abhinav

Growth Session #8 - October 19-20 2017

- Unified dashboard of Github and Bitbucket

- Integrate dashboard in Athena

# Achievements and progress

In the last session, Notifications API of github was integrated. However, the results and response format was not detailed enough for the dashboard details. Hence changed the API integration to `Events` API.

Note: *There are 37 different types of Github Events, each with different response types.*

# Achievements and progress

## Unified Dashboard [Github + Bitbucket]

### Github

4c0b893 Field name checks now case insensitive

5aee270 Merge pull request #9 from Kreozot/case-insensetive Field name checks now case insensitive

# Achievements and progress

The **OAuth 2** library for Bitbucket is not well maintained. OAuth integration of Bitbucket has some minor changes and the gem is not updated to that.

Progress:

1. Forked the gem.
2. Updated the routes and some query parameters.

Pending Issues:

1. Problem in exchanging the oauth_code for access_token.

# Next Steps

- Fix the OAuth integration of Bitbucket.

- Integrate with Bitbucket API.

- Implement the [cool design from Oncel](#).

- Implement the login system in Athena.

# Thanks!
